Am 4. und 5. August werden wieder SSTV Bilder von der Internationalen Raumstation übertragen.

Hier die Ankündigung der AMSAT im englischen Original:

SSTV Event Scheduled for early August

August 03, 2020 – A Slow Scan TV (SSTV) event is scheduled from the International Space Station (ISS) for early August.

Date and times for this event are Aug 4 (12:25-18:10 UTC) for setup and operation and Aug 5 (08:15-18:25 UTC) for operation and close down.

This is an MAI-75 experiment activity developed by the Moscow Aviation Institute.

Images will be downlinked at 145.8 MHz and the expected SSTV mode of operation is PD 120. Radio enthusiasts participating in the event can post and view images on the ARISS SSTV Gallery at https://www.spaceflightsoftware.com/ARISS_SSTV/ (https://www.spaceflightsoftware.com/ARISS_SSTV/).

About ARISS:

Amateur Radio on the International Space Station (ARISS) is a cooperative venture of international amateur radio societies and the space agencies that support the International Space Station (ISS). In the United States, sponsors are the Radio Amateur Satellite Corporation (AMSAT), the American Radio Relay League (ARRL), the ISS National Lab and NASA's Space Communications and Navigation program. The primary goal of ARISS is to promote exploration of science,

technology, engineering, the arts, and mathematics topics by organizing scheduled contacts via amateur radio between crew members aboard the ISS and students. Before and during these radio contacts, students, educators, parents, and communities learn about space, space technologies, and amateur radio. For more information, see www.ariss.org (<http://www.ariss.org>).
